

What I think about 'Veta' after
completion of the course

PAGE NO: / /

After a long time, I found one of the best institutions of spoken English in India 'Veta'.

There are many branches of this institutes in India and abroad also.

I am very lucky to finish this fluent course in two months.

Actually, Earlier I did one English course from British Institutes, that was primary.

I saw the advertisement of Veta in my native city Kolkata. At that time I did not have the option to do it.

After a long time I found a centre in Rajkot. Though the course fee is higher than other institutes but it is so much easier to learn spoken English here than other institutes.

First days, when I went to attend the first class, I was afraid. How would be the environment of the class. But I was wrong. Our faculty is very good. She always helps us. She makes easier all the difficulties of the student anything which they can't understand. We are very much proud of her.

That was very fruitful for us. We gave exams three-four times.

Some of the guys have become very good and fluent speakers after doing this course.

My fluency is also improved than earlier. We have a chance every weekend to go to give the presentation as we want.

One thing which I can't support, the course duration is very short term. I have had lot of expectations from 'Veta'.

The Management of 'Veta' has to think about that.

Above all, we will pray for Veta, that it climb up on rock.

Batch no-29
