

Golden Days of Life to Treasure

"VETA" Institute – does that mean for me a bright star in the sky spreading its light and glow for many years .

That was my first reaction when my friend recommended me the name of this institute . Hearing such an ethnic name of the institute, I was excited to learn much more about it and at that time I remembered a famous saying- 'A walk of a thousand miles, starts from a single step' Therefore after given a little test, I got admission and became a member of this prestigious institution .

The first day when I entered the premises of this institution everything was new as well as unknown to me. My heart was pounding full of excitement, but on the other hand I was nervous too, think about the atmosphere of this institution. As I entered , it seemed as if I had entered into an entirely different world . There was a sea of faces and every face was new to me. I tried to observe keenly each and every face present there in hope of finding at least one familiar face but I am failing in my attempts . And after some time Mam came in the classroom and introduction started . I was wondering how I would be able to carry for forty more days. But the days went and the institute was no more a strange to me. I was lucky enough to find some really good 'Preti Mam' and also true friends. The most important role was played by the 'Preti Mam's that she never let me feel lonely and always welcomed and helped me with my problems. Really, she gave me full encourage and support to remove my hesitation. Since, the very beginning, I remember, I enjoyed each 'n' very moment . Every day I went home with new preaching and a new way to sprout. Here also I got love , care a way to become a disciplined child by my teachers, my 'Pathfinders' . Beside ' teachers' here I found friends who gave me support every difficulty. Sometimes laughing , teasing and gossiping with each other .

After spending such a long time in 'Veta' it is unbearable for me to leave behind such beautiful moments shared with teacher and friends I remember the day when the day when the teacher asked me to introduce myself . I had butterflies in my stomach . But now I feel so confident , so bold and also I have courage walk alone and face the unknown world .

These are the days, which I will treasure and remember forever .
